INDIGENOUS SERVICES CANADA'S

PREPAREDNESS **AND RESPONSE TO COVID-19**

ΞØ

ல

languages

and control

recommended

General Approach

- Provinces and territories provide direct health care services to all Canadians, including First Nations, Inuit and Métis.
- Indigenous Services Canada (ISC) is engaging with provinces and territories to ensure that First Nations, Inuit and Métis are well covered by public health measures.
- Making funding available to support First Nations. Inuit and Métis concrete initiatives improving and adapting the public health response to the needs of their population.
- In First Nation communities, where it supports the delivery of health services and emergency management preparedness and response. ISC is doubling its efforts to ensure resources are available to meet the demands.

Infection prevention and control

Sharing information, training and increasing

capacity to support response, including

• Promoting public health measures for

outside of Canada

public service announcements in Indigenous

individuals and health providers, including:

reminding the public of the importance

of self-isolation of 14 days after travel

reminding the public of the importance

especially in the case of health workers

and health providers on infection prevention

Funding communities and service providers

Nations-run schools, boarding homes, family

to increase their capacity for infection

prevention and control, including First

violence shelters and friendship centres

of not working while symptomatic.

Providing training of community workers

• Requiring daily self-screening of health

service providers, and testing prior

to returning to communities where

Preparedness

- Working to help First Nations communities to prepare and respond to public health emergency
- Funding First Nation communities in pandemic planning and activation
- Funding capacity for Inuit and Métis to effectively participate in national, provincial, territorial planning and response
- Knowledge mobilization and training support by funding First Nation organizations or through Indigenous Services Canada (ISC) regional offices
- Training of health providers working in First Nations communities in use of personal protective equipment (PPE)
- Inventory of medical equipment and supplies across First Nations communities
- PPE stockpile to supplement what exists in provinces for First Nations communities
- Shared Public Health Agency of Canada (PHAC) guidelines on measures communities can take, social distancing, school and daycare closures and mass gatherings, including for remote and isolated settings

Governance

- communities are met
- Operational guidelines through NIHB to adapt medical transportation policies especially for individuals with higher risk factors to use private modes of transportation

Medical transportation

- Infection prevention and control support for service providers such as boarding homes
- Supporting medical transportation of First Nations and Inuit clients while minimizing transmission
- Group within SAC

of Health

- Supporting Indigenous communities through ISC network of Regional Medical Officers, National Health Emergency Network and Communicable Disease Emergency Working Group with First Nations partners
- on Health
- Task Group
- Working through the Métis Health

Canadä

Health human resources

- Supporting First Nations communities through use of health
- Nursing and medical surge capacity
- Paramedic support

human resources

supports

and support

- · Community health representative and public health assistant skill building
- Training of public health nurses to administer COVID-19 testing

- Working to respond to First Nations community infrastructure needs to support response
- Responding to community requests on PPE and other health supply requirements
- Responding to community requests for additional surge capacity in water, food or other supply chain components
- Availability of portable and temporary shelter solutions for health services (assessment and training)
- Availability of portable and temporary shelter solutions for accommodations of additional service providers and self-isolation

Communications and Surveillance

- Working for a coordinated and consistent Canadian approach to COVID-19 to ensure the needs of First Nations. Inuit and Métis
- ISC Minister is on special Cabinet Committee on COVID-19 response
- ISC chief public health officer on FPT Special Advisory Committee (SAC) reporting to the FPT Conference of Deputy Ministers
- ISC and PHAC co-chairing with Indigenous, federal, provincial and territorial partners a COVID-19 Remote and Isolated Settings Task
- Regular briefings with the Assembly of First Nations Executive and Chiefs Committee
- ISC is a member of the Inuit Public Health

Committee involving ISC, PHAC, HC, CIRNAC
